

Experiment 8:

Aim: To create virtual hard disk and allocate the storage using virtual machine workstation.

Requirements: VMware Workstation.

Procedure:

1. Install VMware software.
2. Start to create a new virtual machine.
3. Configure the required fields.
4. Choose to create a new virtual hard disk.
5. Give the hard disk with 15GB to make an easy access.
6. Then create a VM, & boot up the system.
7. If any changes, the system should be powered off.

Result:-

Creating an VM with new Virtual Machine is

successfully completed.
